

Federal Lands Highway Road Inventory Program

Cycle 5 Road Inventory Report

Appalachian National Scenic Trail APPA

Reported By: Federal Highway Administration

Road Inventory Program (RIP) Inventory Updated: 04/2015

Appalachian National Scenic Trail located in 14 States

CT, GA, MA, MD, ME, NC, NH, NJ, NY, PA, TN, VA, VT, WV

Road Inventory Program 04/07/2015 (Numerical By Route #) Page 1

Shading Color Key: Red text denotes approx. mileage White = Paved Routes, DCV Driven

Yellow = Unpaved Routes, DCV not Driven

Blue = All Paved Parking Areas

Green = All Unpaved Parking Areas

Green = All Unpaved Parking Areas

= Concession Route Flag ON

NC - Not Collected

APPA routes were inventoried with consecutive route numbers that increase from North to South along the trail. Routes that are also inventoried in GRSM, BLRI, SHEN, HAFE, and DEWA parks likely have different route numbers in their corresponding park Route ID Reports. Route ID information that overlaps between APPA and another park is included at the end of the APPA Route ID list in this report.

APPA routes were inventoried with consecutive route numbers that increase from North to South along the trail. Routes that are also inventoried in GRSM, BLRI, SHEN, HAFE, and DEWA parks likely have different route numbers in their corresponding park Route ID Reports. Route ID information that overlaps between APPA and another park is included at the end of the APPA Route ID list in this report.

APPA routes were inventoried with consecutive route numbers that increase from North to South along the trail. Routes that are also inventoried in GRSM, BLRI, SHEN, HAFE, and DEWA parks likely have different route numbers in their corresponding park Route ID Reports. Route ID information that overlaps between APPA and another park is included at the end of the APPA Route ID list in this report.

Blue = All Paved Parking Areas

Green = All Unpaved Parking Areas

Green = All Unpaved Parking Areas

= Concession Route Flag ON

APPA routes were inventoried with consecutive route numbers that increase from North to South along the trail. Routes that are also inventoried in GRSM, BLRI, SHEN, HAFE, and DEWA parks likely have different route numbers in their corresponding park Route ID Reports. Route ID information that overlaps between APPA and another park is included at the end of the APPA Route ID list in this report.

General Park Road Functional Classification Table

- Class 1 Principal Park Road/Rural Parkway (Public Roads) Roads which constitute the main access route, circulatory tour, or thoroughfare for park visitors.

 Route Numbers 1 99. Note: Rural parkways (e.g. Natchez Trace) are numbered 1 9. State Routes Inventoried for Park. Route Numbers 5000-5999
- Class 2 Connector Park Road (Public Roads) Roads which provide access within a park to areas of scenic, scientific, recreational or cultural interest, such as overlooks, campgrounds, etc. Route Numbers 100-199.
- Class 3 Special Purpose Park Road (Public Roads) Roads which provide circulation within public areas, such as campgrounds, picnic areas, visitor center complexes, concessionaire facilities, etc. These roads generally serve low-speed traffic and are often designed for one-way circulation. Route Numbers 200-299.
- Class 4 Primitive Park Roads (Public Roads) Roads which provide circulation through remote areas and/or access to primitive campgrounds and undeveloped areas. These roads frequently have no minimum design standards and their use may be limited to specially equipped vehicles. Route Numbers 200-299.
 Note: Functional Classes 3 and 4 have the same route numbers because, historically, they were numbered similarly.
- Class 5 Administrative Access Road (Administrative Roads) All public roads intended for access to administrative developments or structures such as park offices, employee quarters, or utility areas. Route Numbers 400-499.
- Class 6 Restricted Road (Administrative Roads) All roads normally closed to the public, including patrol roads, truck trails, and other similar roads. Route Numbers 400-499.

 Note: Functional Classes 5 and 6 have the same route numbers because historically they were numbered similarly and often there is little distinction between these routes. For example, because utility areas and employee housing are often closed to the public, this restriction would result in classification of FC 6 rather than FC 5.
- Class 7 Urban Parkway (Urban Parkways and City Streets) These facilities serve high volumes of park and non-park related traffic and are restricted, limited-access facilities in an urban area. This category of roads primarily encompasses the major parkways which serve as gateways to our nation's capital. Other major park roads or portions thereof, however, may be included in this category. Route Numbers 1-9.
- Class 8 City Streets (Urban Parkways and City Streets) City streets are usually extensions of the adjoining street system that are owned and maintained by the National Park Service. The construction and/or reconstruction should conform with accepted local engineering practice and local conditions. Route Numbers 600-699.

A park road system contains those roads within or giving access to a park or other unit of the NPS which are administered by the NPS, or by the Service in cooperation with other agencies. The assignment of a functional classification (FC) to a park road is not based on traffic volumes or design speed, but on the intended use or function of that road or

The historic route numbering system also included a 300 number series for interpretive roads, and a 500 series for one-way roads. There are approximately 250 roads nationwide which are designated by the 300 and 500 series. The numbers for these roads will be maintained for reporting consistency. However, since these interpretive and one-way routes are not as clearly tied to a specific functional class, the 300 and 500 series will be discontinued for future use.

5000 route numbers are assigned to Non-NPS Routes that are State, County or City owned which border, traverse, or provide access to Park Facilities or Locations. 5000 Routes are driven for GPS and Video Log only.

Surface Type Abbreviations:

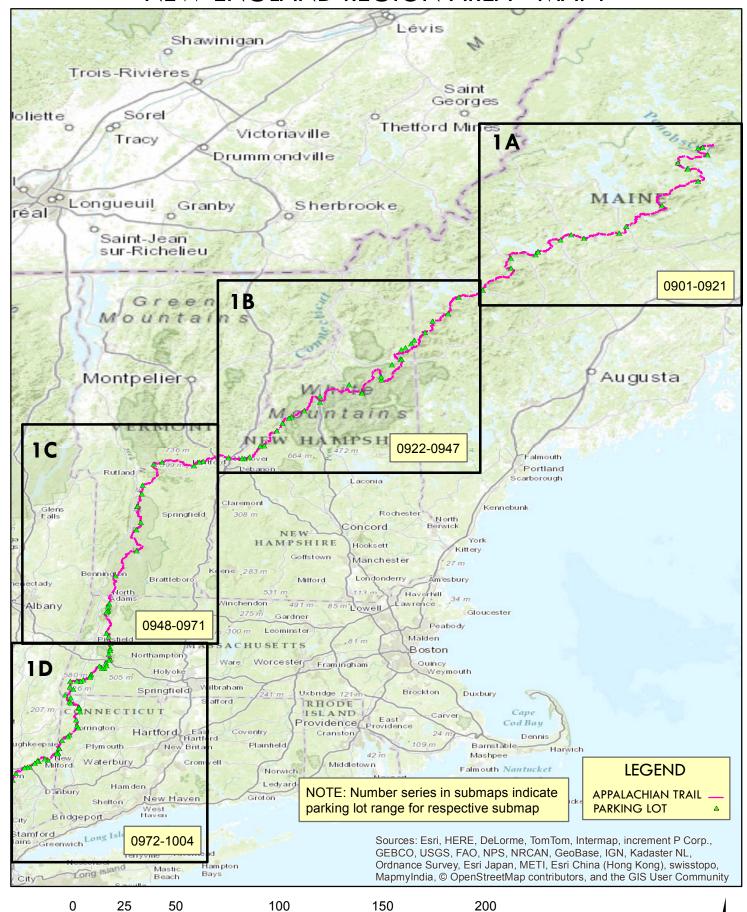

- AS Asphaltic Concrete Pavement
- **CO Portland Cement Concrete Pavement**
- BR Brick or Pavers Road Bed
- **CB Cobble Stone Road Bed**
- GR Gravel Road Bed
- SA Sand Road Bed
- NV Native or Dirt Material Road Bed
- OT Other Materials Road Bed
